

31 January 2014

To whom it may concern:

Dear Sir / Madam,

Depnil 150 mg & Depnil 300 mg:

As per our previous communication, we expected Depnil 300 mg to be available by mid-January 2014. Unfortunately, due to unforeseen manufacturing setbacks, we now expect Depnil 300 mg to be back in stock by early April 2014. A notification will be sent out as soon as stock is available again.

In the interim, we are happy to inform you that a limited amount of Depnil 150 mg is now available. However, due to international active pharmaceutical ingredient challenges and other manufacturing concerns, we are unable to guarantee an uninterrupted future supply of Depnil 150 mg. As Depnil 300 mg tablets are scored on both sides, we respectfully request that you consider halving the 300 mg tablet for patients who require 150 mg moclobemide.

We sincerely apologise for any inconvenience caused. Please feel free to contact us should you need any further information.

Yours sincerely,

Jacques van Staden
Sales Director
